What is Cultural Humility?
Is a humble and respectful attitude toward individuals of other cultures that pushes one to challenge cultural biases, realize we cannot possibly know everything about other cultures, and approach learning about other cultures as a lifelong goal and process.
Is to maintain a willingness to suspend what you know, or what you think you know, about a person based on generalizations about their culture. Rather, what you learn about clients' culture stems from being open to what they themselves have determined is their personal expression of their heritage and culture.
Cultural humility is about accepting our limitations. Those who practice cultural humility work to increase their self-awareness of their own biases and perceptions and engage in a life-long self-reflection process about how to put these aside and learn from clients (Tervalon & Murray-Garcia, 1998).

**WHY CULTURAL HUMILITY?**

Cultural humility was established due to the limitations of cultural competence. Some professionals believed themselves to be culturally competent after learning some generalizations of a particular culture.
