6. The number of times MPD requested footage from a Program recipient, and whether the request was granted or denied by the Program recipient.

There were no new documented requests for footage by MPD from program recipients. MPD detectives may also be in direct contact with a program recipient without that information being specifically tracked by existing law enforcement resources.

7. The number of times that footage from a private security camera contributed to a successful arrest by MPD, including a breakdown by offense.

It is difficult for MPD to track and report on this data. For one, there is often a significant amount of time between when a video is pulled and an arrest is made. In cases for which video is pulled, reviewed, and found to contain something of value, MPD will seek a warrant and potentially go through a grand jury process. Moreover, there is a range of ways in which video footage can contribute to an arrest. Many of these do not involve a suspect caught on camera, but rather a witness or perhaps a person or vehicle of interest. Lastly, detectives are not personally tracking whether a camera is an MPD-owned camera, a government camera, a private security camera, or a private security camera owned by a rebate recipient. Tracking this information is not part of their core function. Establishing a system to track the specific utility of video and the type of camera that recorded it until an arrest is actually made is not an efficient use of law enforcement resources better directed at investigating crime. Therefore, MPD is unable to provide comprehensive data on this.

8. An analysis of the Program's implementation and plans for future expansion, if any.

OVSJG continues to successfully implement the program and there are no current plans for future expansion.
